Re: Software Engineer, Entry Level

Dear Hiring Manager,

As an experienced Junior Software Engineer, I am writing to express my interest in the Software Engineer, Entry Level position at Coursera. I have experience in various technical projects specializing in software development and back-end programming, as well as active learning opportunities from my Computer Programming and Analysis course at George Brown College.

My leadership and interpersonal skills, paired with focus in Java, JavaScript and Python, have proven to highly contribute in troubleshooting and enhancing software to be the most efficient and user-friendly. My keen interest in projects to support integration development and testing along with the ability to develop code in line with strategic initiatives would be highly beneficial to your development team. I have experience in practicing both Agile and Iterative approaches in group projects and value the input of all team members equally.

I look forward to setting up a time to discuss how I can be a valuable addition to your team at Coursera. I can be reached via email at paolo.tous@georgebrown.ca or at 647-673-7031. My resume is attached for your review and I thank you for your time.

Sincerely,

Paolo Tous
